## Accordion Keys

### If You Have a Key and Need an Additional

Bring the key to the Storm Smart Store at 11040 Plantation Rd, Fort Myers 33966 for us to verify the code on the key and provide additional.

### If No Key(s) is Available

Storm Smart will need to review the lock to identify the key needed. There are two types of locks, and you will need to determine which type is on your accordion:

- **Pushbutton:** Remove the lock and bring it with you to the Storm Smart facility to test which key is needed.
  - When your accordion is in the open position, find which side the lock is on. Using a Phillips head screwdriver remove the two screws on the back of the lock, that is holding the lock onto the centermate. Be careful not to strip the screws while removing. Once the lock is removed, reinsert the screws back into the lock so you don't misplace the screws. Bring the entire lock with you to the parts shop and we will determine the type of key specific to the lock you have.
- **Deluxe:** Contact Storm Smart at 239-938-1000 ext. 2000 to schedule a Service call. These locks are tricky to remove, and a technician will need to determine which Deluxe key is needed.
